

永續延伸 Sustainable Development

從1條高速公路拓展到高速公路整體路網，從373公里延伸到1,000多公里，從人工收費轉變為電子收費，我們一步一腳印，紮實地維護每一吋公路，用心地服務每一位用路人……

未來，我們將以永續發展為前提，繼續提升養護技術及工作，維持高速公路品質以延長使用年限；全力推動高速公路智慧化，提高運輸效率及服務水準；持續關心並復育沿線生態和環境，減輕與補償道路建設對生態環境的傷害。一切的努力，都是配合環境保護及節能減碳，不僅只就高速公路本身，更是追求人類社會與大自然的和諧與永續。

我們將以此為最高指導原則，做為愛護地球環境，永續經營的具體實踐。相信在你我共同努力下，我國高速公路運輸將可邁向智慧導航的新紀元。

From one freeway to a complete freeway network, from 373 kilometers to over 1,000 kilometers in total, from manual to electronic toll collection, the National Freeway Bureau has been, step by step, making great strides by properly maintaining every inch of our freeway. Indeed, we dedicate ourselves to giving every freeway user the best service.

Looking toward the future, sustainable development will assuredly remain our primary consideration. We will continue to improve maintenance techniques, enhance freeway quality to prolong the life of freeways, promote intelligent transportation, enhance transport efficiency, and upgrade service quality. Meanwhile, we are committed to preserving and restoring ecological and environmental resources along freeways, as well as minimizing or making up any damage done by our construction projects to ecology and environment. Our goals are in agreement with the global objectives of environmental protection, energy-saving, and carbon-reducing efforts. We do these not only for the freeway network itself, but also for the lasting, harmonious relations between human society and nature.

The National Freeway Bureau promises to make these our guiding principles for loving the Earth by contributing to sustainable development. Working hand-in-hand, we will be able to create another Taiwan miracle and bring this country's freeways to a Ushering in A New Era of Intelligent Transportation .

築夢踏實 Making A Dream Come True
