3) The land under the viaducts of freeways can be planned and used by regional governments on the premise that freeway driving safety, bridge structure safety, structure inspections and maintenance and environmental hygiene are not hindered, no buildings are built and no combustible and hazardous articles are stored. After being approved of their planning of the land utilization, local governments may contract the land, and work on tendering lease so as to receive utilization fee. So far, 98 places have been contracted for utilization and their classification is as follows:

	Freeway No.1	Freeway No.2	Freeway No.3	Freeway No.4	Freeway No.5	Freeway No.10	Sub-total
Parking lot for official purpose	2	3	22	4	1		32
Fee parking lot			1				1
Activity site	1	3	19	2			25
Athlete field			2				2
Market		1	2				3

Wireless engine room	1	1	1		1		4
Voluntary watch-out station			2				2
Tape-water pumping station	1		1				2
Anti-flood water pumping station	2		1				3
Recycling site			4			1	5
Park			4				4
Materials storage warehouse	1		10	2	1		14
Engineering office			1				1
Sub-total	8	8	70	8	3	1	98
